

PROFESSIONAL SUMMARY

Computer Science graduate specializing in data analysis and data science, with hands-on experience across the full analytical workflow — data cleaning, exploratory analysis, statistical analysis, and visualization/dashboarding. Currently pursuing the Microsoft PL-300 (Power BI Data Analyst Associate) certification. Complements this analytical foundation with strong software engineering skills — building full-stack applications (React/TypeScript, Flask/FastAPI) and training ML models spanning NLP and computer vision — enabling end-to-end delivery from raw data to a working dashboard or model. Quick learner, adaptable to new tools and domains.

TECHNICAL SKILLS

Data Analysis & BI: SQL, Power BI (PL-300 in progress), Excel, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Pandas, NumPy

Data Science & ML: Machine Learning, Deep Learning, NLP, Computer Vision, LLM Fine-tuning, RAG, TensorFlow, PyTorch, Scikit-Learn, Hugging Face Transformers, OpenCV

Web Development: React.js, TypeScript, JavaScript, HTML/CSS, REST APIs, Flask, FastAPI, Node.js basics

Languages & Tools: Python, JavaScript, TypeScript, SQL, Git/GitHub, Docker, CI/CD, Vercel

PROFESSIONAL EXPERIENCE

- Software Engineering Intern

06/2024 – 08/2024

Inter-Services Public Relations (ISPR), Rawalpindi

 - Analyzed operational workflow data to identify inefficiencies, then developed Python automation scripts that cut manual processing time by 25%
 - Assisted with software testing and QA, validating data accuracy and application reliability across releases
 - Collaborated with cross-functional teams on system maintenance and reporting-process improvements
- Software Engineering Intern

05/2023 – 07/2023

Special Communications Organization (SCO), Rawalpindi

 - Contributed to internal dashboards used for operational reporting, improving how data was surfaced to stakeholders
 - Supported production system maintenance, helping sustain 99% uptime
 - Gained exposure to internal data reporting tools and communication infrastructure

PROJECTS

- Real-Time Luggage Monitoring System (Final Year Project)

Python, OpenCV, YOLOv8, Flask, PyTorch, Docker

 - Built an end-to-end computer vision pipeline for real-time unattended-luggage detection; trained a YOLOv8 model to 90% accuracy on a custom dataset
 - Implemented spatial-temporal tracking analysis to reduce false positives by 40%
 - Delivered results through a Flask dashboard for security personnel to monitor and review detections
- NewsDigest — AI Text Summarization Engine

Python, T5, Hugging Face Transformers, Flask, React.js

 - Fine-tuned a T5 transformer model for abstractive summarization of long-form articles and documents
 - Built a production REST API with an optimized inference pipeline; caching and batching cut latency by 50%
- ZEN — Personal AI Knowledge Assistant

TypeScript, React.js, RAG

 - Built a full-stack RAG chatbot with document Q&A, using vector embeddings for semantic search at 85% retrieval accuracy

EDUCATION

- Bachelor of Science in Computer Science

09/2021 – 06/2025

National University of Modern Languages (NUML), Rawalpindi
- Intermediate in Computer Science

08/2018 – 06/2020

FG Sir Syed College, Rawalpindi

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) — In Progress
- IBM SkillBuild — Artificial Intelligence & Machine Learning Fundamentals
- HP LIFE — Data Science and Analytics
- HP LIFE — Agile Project Management
